

Product Portfolio for Range Device Assembly Machines

Highly flexible and scalable platforms for assembling, labelling and secondary packaging.

Precise and reliable assembly of different MedTec devices:

- ▣ Pens
- ▣ Auto-injectors
- ▣ Cannula / needle
- ▣ Catheter
- ▣ Safety device
- ▣ Inhaler
- ▣ Infusion sets

- ▣ Versatile standard tooling for individual tasks
- ▣ Possible to integrate processes e.g. labelling, packaging and serialization

Innovation in the Assembly of Devices: Rapid Format Exchange for Real Flexibility

- ▣ Implementation of several device formats on one machine
- ▣ Standard machines with small footprint which can be retooled for any known device standard
- ▣ Rapid changeover between the different formats of the known device standards
- ▣ Future new device types can be introduced easily and at lower costs
- ▣ Short ROI due to high utilization rate of the flexible range machine
- ▣ Also available as dedicated machine

Range Platform – Flexible & Scalable Solutions on Standard Platform

RMA – Range Manual Assembly

Manual Workstations

- ▣ Up to 5 – 7 ppm

RDA – Range Device Assembly

Semi & fully-automated lines on standard platforms

- ▣ Semi-automatic infeed up to 50 ppm
- ▣ Fully-automatic up to 300 ppm

Customized service solutions for the entire life cycle of your machine.
